

FINVEX GROUP SA

FINVEX SUSTAINABLE & EFFICIENT EUROPE 30 INDEX

CERTIFICATION DECLARATION 1ST QUARTER 2019

To the Index users,
To the Index Sponsor Finvex S.A.,
To the public,

Forum ETHIBEL asbl¹ is appointed by Finvex Group² to execute independent monitoring and certification of the **Finvex Sustainable & Efficient Europe 30 Index** (FSEURE) concerning its conformity with the non-financial aspects of the rulebook of the Index composition process.

Index set-up

General outline. The **Finvex Sustainable Efficient Europe 30 Index** is designed to reflect the performance of a dynamic portfolio of thirty equally weighted equity securities listed on various Europe-wide exchanges. The 30 securities are selected from the Reference universe, which is the **Dow Jones Sustainability Europe Index**. This is a 'sustainable' universe of European equities, which are subject to a risk assessment with the intention to avoid illiquid, risky stocks and selecting stocks with interesting diversification characteristics.

Index Sponsor/Calculation Agent. **Finvex** is the Index Sponsor. **S&P Opco**³ is the Calculation Agent⁴.

Selection process of the Finvex Index. The "Guidebook: the Finvex Sustainable Efficient Europe 30 Index (Net Return and Price Return)" details the selection methods and is available to clients only.

Reference universe. The Reference universe is derived of the so-called Corporate Sustainability Assessment (CSA), a sustainability selection process⁵ performed by RobecoSAM⁶, listing equities that provide evidence of the best performance regarding Environmental, Social & Governance Practices ("ESG").

ESG criteria. The "Dow Jones Sustainability Indices Methodology, December 2018" provides all details⁷.

Philosophy of DJSI/RobecoSAM. Two guiding principles apply: (i) Sustainable business practices are critical to the creation of long-term stakeholder value in an increasingly resource-constrained world; (ii) Sustainability factors represent opportunities and risks that competitive companies must address. RobecoSAM believes that the integration of sustainability criteria into traditional financial analysis leads to better informed investment decisions. The evaluation of companies' quality of management and future performance potential enables the identification of attractive investment opportunities that can generate long lasting value.

Best-in-class. The best-in-class approach selects sustainability leaders from across all industries based on pre-defined sustainability criteria. Best-in-class means that: (i) no industry is excluded from the indices, with the most sustainable companies in each industry selected for index membership; (ii) companies receive a total sustainability score between 0 and 100 and are ranked against other companies in their industry; (iii) only the top 20 % of companies from each industry are included in the Dow Jones Sustainability Europe Index.

Media and Stakeholder Analysis (MSA). The MSA is built into the CSA. MSA includes monitoring of media and stakeholder commentaries and other publicly available information from consumer organizations, NGOs, governments or international organizations to identify companies' involvement to environmental, economic and social crisis situations that may affect their reputation and core business.

Further specifications on the Finvex Sustainable Efficient Europe 30 Index can be found at: <http://finvex.com/fseure>.

Operational modalities. **Finvex Group** runs a script with monthly deliveries of the eligible universe and of updates of the Index composition. Constituents that no longer comply with the criteria are excluded from the Index. Based on quarterly audits by **Forum ETHIBEL**, **Finvex Group** publishes updated Certificates on a quarterly basis on its website.

Certification liabilities

Role of Forum ETHIBEL. **Forum ETHIBEL** solely acts as auditor and certification institute. The Ethibel label is not involved in any way in the assignment.

Meaning and scope. A certificate or a 'declaration of certification' is a written testimony of conformity of a product with its self-imposed rules and regulations and/or quality requirements.

Dedication. A **Forum ETHIBEL** certificate provides evidence that a financial product or instrument is in line with its non-financial criteria and processes as defined by its prospectus, rulebook, and regulations or otherwise stated specifications.

Verification and quarterly revision

Forum ETHIBEL has executed the audit in full accordance with the contractual obligations and determinations.

This certification declaration is based on the previous three monthly deliveries of the Index composition. The most recent Rebalance date was set on October 2, 2018. Conformity has been verified against the stated principles and the involved sustainability procedures, which are checked annually (September). All evidence provided by **Finvex** and **Robeco-SAM** on the involved screening and monitoring processes and the related internal management systems regarding thoughtfulness and quality have been checked. While carrying out the audit, our additional inquiries were answered.

The Index composition as at January 3, 2019 is as follows.

Company Name	Rating Sector	ISIN code
AKZO NOBEL	Materials	NL0000009132
ALSTOM	Industrials	FR0010220475
AXA SA	Financials	FR0000120628
